27 February 2014

Dear Mrs Culmer

This report outlines your patient feedback from the Improving Practice Questionnaire (IPQ). Your results have been illustrated in tables and graphs with associated benchmarks where applicable. Details of score calculation and statistical methods have been provided to help you in the interpretation and understanding of your results. You will also receive an A4 poster summarising your results and a certificate of completion which you may like to display to patients to indicate that you value their views in order to inform positive change within your practice.

If you are carrying out this survey in order to help meet the requirements of the patient participation directed enhanced service (DES) for GMS contract, a guidance template for discussion of these local survey findings and an action plan have been included which may help facilitate discussions with your patient reference group (PRG).

The format of this report has been updated, which we hope will provide you with a clearer picture of performance.

We hope these results give you useful feedback as to how patients rated the practice and its service, and provide you with a basis for reflection. In order to enable us to improve our services we would be grateful if you could complete a feedback form using the following link:

<http://www.cfepsurveys.co.uk/questionnaires/feedback/default.aspx?psid=169322>

Please contact the office on 0845 5197493 or reports@cfepsurveys.co.uk if you require further information about your report.

Yours sincerely

Helen Powell  
Survey Manager

# Report Contents

## Introduction

### Your patient feedback

Distribution and frequency of ratings (table 1)	P1
Your mean percentage scores and benchmarks from all participating practices (table 2, graph 1)	P2
Your mean percentage scores and benchmarks by practice list size (table 3, graph 2)	P3
Your patient demographics (table 4)	P4
Your current and previous mean percentage scores (table 5)	P5
Your patient comments	P6

Details of score calculation
Explanation of quartiles
Page by page guide to the interpretation of your report
Sample questionnaire

## Introduction

### About the IPQ

The IPQ is a well-established questionnaire widely used in the UK.

Since 2004, over 3,000,000 patients have completed an IPQ providing valuable patient feedback to over 4,000 practices and over 16,000 health practitioners, many of these practices and health practitioners having completed the survey on more than one occasion.

Extensive published validation studies have established that the IPQ is a reliable and sensitive tool: accurately measuring patient satisfaction in designated areas and is sensitive to change - if the IPQ is carried out on more than one occasion any change in patient perception of service can be clearly and reliably monitored.

This report outlines the feedback that has been collected and analysed from a sample of your patients. Full explanation on how to interpret this information can be found in the report. We hope that this feedback is useful and a basis for reflection.

A sample of the IPQ questionnaire is included at the end of this report for reference.

### About the benchmarks

Benchmarks are a useful guide as to how your practice performed in relation to all the practices who have carried out an IPQ survey. Benchmark data provided relates to either all practices or according to practice list size (the practice list size benchmarks displayed in this report are representative of your practice), as we have established this plays a part in scores achieved. However, it should be noted that other factors such as geographical location and clinical setting may also affect scores and benchmarks may not always be truly representative. Furthermore as it is not mandatory for a practice to carry out an IPQ survey, benchmarks provided are effectively based on data collected from a *volunteer* sample. Volunteer samples often perform better than an 'average' sample which could make the benchmarks provided artificially high.

### Your feedback

From the report you will be able to clearly pinpoint areas where you scored well and also those areas where you might feel that improvements may be needed. However, it is advisable to take time to assimilate all the feedback and to avoid scanning the report and noting specific scores on which too much emphasis can be placed. In fact, the clearest reflection of patient satisfaction can often be seen in the frequency and distribution of patient ratings and in their written comments.

A page by page guide to the interpretation of your report has been incorporated in the supporting documentation at the end of this report which you may find useful.

### Other useful information

Together with your report you will receive:

- An A4 poster: to enable you to share the results of your local survey with the patients in your practice.
- A 'Guidance template for discussion of local findings and action plan': completion of which may help you meet the requirements of the patient participation directed enhanced services (DES) for GMS contract, if required.

Your patient feedback

## Your patient feedback

Table 1: Distribution and frequency of ratings, questions 1-28

Question	Poor	Fair	Good	Very Good	Excellent	Blank/spoilt
Q1 Opening hours satisfaction	1	7	40	42	17	4
Q2 Telephone access	3	7	34	39	25	3

## Your patient feedback

All written patient comments have been included in their entirety but details which could identify a specific patient have been removed to ensure anonymity.

## Any comments about how this practice could improve its service?

- Reduce its waiting times. My appointments are always at least half an hour late.
- Please could the reception staff answer the telephone as soon as it starts to ring. The patient on the other end of the phone is paying for the call from before it starts to ring at reception.
- My children would appreciate toys in the waiting area.
- Reception area more private to discuss things.
- None. Fantastic staff. Very helpful.
- Being able to contact via a normal landline number. I resent having to use 0844 as these are very expensive from a mobile phone, and I disagree with revenue being earned from phone calls.
- Remove the expensive phone number as it makes it difficult to make an appointment when out.
- Less waiting time.
- Inform patients on arrival if doctor/nurse is running late.
- New reminder system much better, states doctor seeing and at which site.
- Hayfield Surgery open all week.
- Have one night where the practice opens later or a Saturday morning.
- Turn down the 'music'/radio in the waiting room. Not everyone likes this kind of music, particularly if not feeling well.
- Thought I would mention that Hayfield surgery is terribly hot at times. Can the heating be adjusted?
- Not open Mondays so don't be ill at weekends. Not everyone able and willing to go to New Mills.
- I don't like the fact that the phone number is an 08 number. I can't ring these on my phone as I am on a capped contract.
- To inform me of my medicine review. This is because I do not receive the copy of the prescription. May this be rectified - I will ask the assistant at the chemist.
- Find an alternative to the expensive 0844 number.
- I have 3 young children and it would be useful to have a doctor who was available to do home visits at evenings or to ill children.
- Nothing - its a lovely environment with excellent staff.
- This is a good, well run practice with high quality clinical provision.
- Obviously having your own doctor available for out of hours visits would be excellent but I realise this is a thing of the past.
- I have no comment. No-one if they busy looks at you. You stand waiting for ages.
- Opening hours for Saturday and Sunday.
- I have always been treated with respect and compassion.
- You can overhear conversations with receptionist with patients (telephone). Maybe a different format to keep detail of people private. Some children's toys in waiting room.
- Get rid of 0844 call number as its 50p a minute off mobile. Other than that, no problem all in all a brilliant practice.
- No improvement needed in my opinion.
- Keep Mayfield open.

## Your patient feedback

All written patient comments have been included in their entirety but details which could identify a specific patient have been removed to ensure anonymity.

### Any comments about how the doctor/nurse could improve?

- No.
- This doctor always provides an excellent service.
- Be available for telephone or visit out of hours rather than having to use the NHS helpline which is next to useless.
- Nurses excellent.
- They are all super.
- Everything else is very good.
- I put my trust in the doctor but needs to listen more.
- I once needed an appointment for a problem with gout but I could not see a doctor for a number of days. I ended up having to go to the drop in centre at Hyde Bank, New Mills. I feel this was unacceptable.
- The doctors all work extremely hard and give excellent service.
- No.
- I feel the doctors and nurses are very nice here. I have recommended this practice to friends whom have since transferred to here.
- My doctor is the best doctor I've ever had. Very caring and extremely helpful. I would never see another doctor.
- Great practice overall.
- Better time keeping.

### Details of score calculation

The score provided for each question in this questionnaire is the mean (average) value of all of the ratings from all patients who completed the question. It is expressed as a percentage - so the best possible score is 100%.

Example using data from your Q1 Opening hours satisfaction

Total number of patients responses = 111

Questionnaire rating scale	Poor	Fair	Good	Very Good	Excellent	Blank/spoilt
Number of ratings	1	7	40	42	17	4

Value assigned to each rating	0	25	50	75	100	n/a

$$\frac{\text{(number of Poor ratings x 0) + (number of Fair ratings x 25) + (number of Good ratings x 50) + (number of Very Good ratings x 75) + (number of Excellent ratings x 100)}}{\text{(Total number of patient responses - number of blank/spoilt)}} = \frac{(1 \times 0) + (7 \times 25) + (40 \times 50) + (42 \times 75) + (17 \times 100)}{(111 - 4)} = 7,025/107$$

Your mean percentage score for Q1 = 66%

### Explanation of quartiles

In statistics a quartile is any one of the three values that divide data into four equal parts, each part represents ¼ of the sampled population.

Quartiles comprise:

- Lower quartile, below which lies the lowest 25% of the data
- The median, cuts the data set in half
- Upper quartile, above which lies the top 25% of the data

Please note that the benchmarks presented in this report are based on data obtained from a volunteer sample of practices, and as such may be artificially high.

Question	Your mean score (%)
Q1 Opening hours satisfaction	66

Benchmark data (%)*				
Min	Lower quartile	Median	Upper quartile	Max
23	64	68	73	92

9541

\*Based on data from 927 practices carrying out 1,326 surveys between April 2010 and March 2013 with 25 or more responses.

## Supporting documents

Page by page guide to the interpretation of your report

### Page 1

The frequency distribution table (table 1) shows the number of patient ratings from poor to excellent and the number of 'blank/spoilt' responses for every question (a blank response is where a patient did not respond to the question and a spoilt response is where more than one tick box option was chosen or if the questionnaire was defaced). If these values are added up, for any one question, this will equate to the total number of patients surveyed (shown in the top right hand corner of the page). This table clearly shows the degree of satisfaction patients have with each aspect of the practice considered. Please note the spread of the ratings. Are they widely spread or closely packed around one or two specific ratings? One or two higher or lower ratings can make a big difference to your mean percentage scores illustrated in tables 2 and 3.

### Page 2

The mean percentage score and benchmark table (table 2) illustrates your mean percentage scores for each question calculated from the data in table 1. Each score is the mean (average) score calculated from valid patient ratings (i.e. not the blank/spoilt responses) expressed as a percentage (see score calculation sheet also in the supporting document section of your report). It has been established by our statisticians that the reliability of your patient feedback for any one question may be marginally reduced if less than 25 valid patient responses is achieved (this number can be determined from table 1). In the event that there are less than 5 patient responses, the corresponding score for the question will not be illustrated.

Your scores have been displayed in colour coded boxes to indicate how your score falls within the benchmark data (within the highest 25%, the middle 50% or the lowest 25% of all the mean percentage scores achieved by all practices in the benchmark sample). The provenance of the benchmark data is provided in the footer below the table.

Graph 1 illustrates your mean percentage scores in ascending order of performance with benchmark means from all participating practices.

### Page 3

Table 3 and graph 2 are the same as for page 2, but with benchmarks provided relevant to your practice list size. Evidence indicates that practices with smaller list sizes tend to perform better than those with larger list sizes.

### Page 4

Table 4 shows the number of patient responses from each 'demographic' group detailed on the questionnaire i.e. age, gender, if the patient saw their usual practitioner or not and the number of years attending the practice. Demographic category mean percentage scores are calculated from all the ratings from all questions for that demographic group. Associated benchmark mean scores relevant to your practice list size are also provided.

The same criteria concerning reliability of the feedback as explained in Page 2 above applies.

### Page 5

Table 5 lists your current scores for each question together with scores from your last 3 surveys (if applicable) for comparison.

### Page 6

Patient comments usually reflect scores achieved. The IPQ was designed to simulate the patient's chronological journey through their visit to the practice. Although the questions in the IPQ are generic, comments can pinpoint specific issues identified by the patient from any part of this journey. If there is a particular problem within the practice e.g. getting through in the morning on the telephone or the lack of chairs in the waiting room suitable for the elderly, this can be clearly picked up in the themes and frequency of comments.

In order to ensure patient anonymity, any personal identifiers are removed. In the unlikely event that we receive a written comment which might relate to serious professional misconduct (e.g. allegations of sexual assault), the comment would be referred to our Clinical Associate who would discuss the matter with you.

## You can help this general practice improve its service

- This practice would welcome your honest feedback
- Please read and complete this survey after you have seen the
- All the information provided by patients is put together in a report for the practice. Your answers will not be identifiable. Any comments you make will be included but all attempts will be made to remove information that could identify you.
- Once completed, please return this survey to reception in the envelope provided

Please mark the box like this  with a blue or black ball-point pen. If you change your mind just cross out your old response and make your new choice.

**When giving your feedback, please only consider the consultation you have had today.**
